

WHAT ARE METALPHOTO PLATES?

... the low-cost in-plant method for producing permanent panels, wiring diagrams, schematics, in minutes ... using standard film negatives and darkroom techniques.

ADVANTAGES of Metalphoto:

✓ **Permanence; indestructibility.** Can't destroy the image without destroying the metal itself!

- Impervious to salt spray ... organic solvents, lubricants;
- Impervious to scratching, cracking, crazing, peeling;
- Resistant to fading, fungus, mold, temperature extremes;
- Can withstand repeated scouring; if spray painted, easily restored to original brilliance and legibility.

✓ **Versatility.** Reproduce any image with standard darkroom methods.

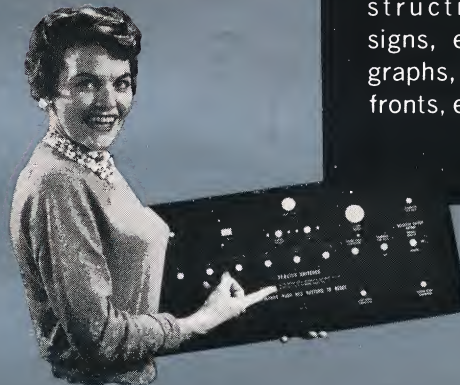

✓ **Speed of processing.** Produce in minutes what once took days or weeks.

✓ **Attractive:** Glistening surface; sharp images with fine detail, and can be attractively colored in any of six tints.

They are blank, photo-sensitive aluminum plates, in which photo-images are imbedded in a layer of aluminum oxide beneath a sapphire-hard anodized layer. Not a surface coated emulsion, but imbedded in metal beneath a smooth, polished surface impervious to heat, salt, weather, abrasion!

HOW are they used?

Anything which can be photographed can be reproduced permanently in Metalphoto plates. Ideal for instrument panels, dials, instructions, labels, signs, exterior photographs, plaques, panel-fronts, etc.

OTHER METALPHOTO BENEFITS:

- **LOW COST** — less than other competitive processes because materials are relatively inexpensive and special skills or training are not necessary.
- **WORKABILITY.** Processed plates may be cut, drilled, shaped and cold-formed in a wide range of operations.
- **DIMENSIONAL STABILITY.** Unaffected by humidity, aging, warping. Image dimensions vary only by the thermal expansion and contraction of the metal itself: very slight.
- **DETAIL:** degree of resolution surpasses all other known photographic materials; permits extreme reduction without loss of detail.

TYPICAL USERS OF METALPHOTO: Ansco Division of General Aniline and Film Corp., Avco Mfg., Bausch & Lomb, Bendix, Bethlehem Steel, Cleveland Museum of Art, Convair and Electric Boat Divisions of General Dynamics, Eastman Kodak, Erie Railroad, Federal Telecommunications Labs Division of ITT, General Electric, Ingalls Shipbuilding, Iron Fireman, George J. Mayer, Newport News Shipbuilding, New York Shipbuilding, Texas Nameplate, Thompson Ramo Wooldridge, University Hospital (Cleveland), Warner & Swasey, Western Electric, Westinghouse and White Motor.

HOW METALPHOTO PLATES ARE PROCESSED:

Standard film negatives and darkroom procedures are used, as with ordinary photographic paper. Easily processed in company photographic department or by any local photographic agency.

TO PRINT: use any contact printing frame; place film negative on a sensitized Metalphoto plate and expose 10 to 40 seconds. Immerse in water, develop, rinse and fix in conventional manner.

TO TONE: and for jet-black images against metallic-white background, immerse in bath of Metalphoto Image Toner for 3 to 5 minutes.

TO COLOR: immerse in proper Metalphoto Chemical Color prior to sealing. Your choice of red, green, gold, copper or blue tints.

TO ENLARGE: merely use greater light intensity than in standard enlargers; using photoflood bulbs and conventional enlarging techniques.

TO SEAL the image permanently, immerse the plate briefly in boiling water. This is the only operation that differs from the paper photographic process.

TO SPEED PRODUCTION PRINTING: use multiple negatives to obtain many final units from a single plate. This can keep production high and costs low; processed plates are easily cut apart when finished.

TRIAL KITS ARE AVAILABLE:

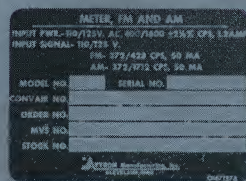

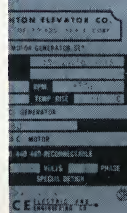

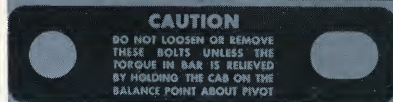

Prove to yourself the merits of METALPHOTO plates for your particular needs and potentials; try a few in your own darkroom. Kits contain instructions and everything you need: test plates, chemicals, and all: Kit #10, with a dozen 4x5" test plates . . . \$10. Large kit with small and large (8x10") plates and 5 tint colors . . . \$27.25. Money back if not satisfied for any reason. Send for trial kit today.

Photosensitive Aluminum Plates

The New Concept of Permanent Photographic
Reproductions in Anodized Aluminum Plates

METALPHOTO CORPORATION

18531 SO. MILES RD. • CLEVELAND 28, OHIO

Telephone: 475-0555

EFFECTIVE FEB. 1, 1963

WESTERN UNION — TELEX 098-478 — METLPHOTO WVHT

METALPHOTO PLATES

Metalphoto plates are photosensitive anodized aluminum plates which can be converted into practically any product imaginable, such as precision dials, panel fronts, instruction panels, commemorative award plaques, schematics, I.D. badges . . . This list can go on endlessly.

However, one point we would like to make clear is that Metalphoto plates are processed with no more effort than used to print a wallet photo from your favorite negative.

A negative, standard photographic chemicals and techniques used with Metalphoto plates will produce a permanent photographic reproduction. The image is locked in a clear, glass-like sapphire-hard, fully anodized layer. Metalphoto has been thoroughly tested by both government and industry and found to be, because of this layer, resistant to fire, acid, salt spray, abrasion, corrosion and sunlight, all of which would efface or destroy similar products.

It takes no special skill and requires no handling of corrosive or dangerous chemicals to quickly convert Metalphoto into any one of a number of useful and cost saving products.

METALPHOTO STOCK NUMBERING SYSTEM

F—Standard Cut Plate, one side printable

U—Econopak Plate, one side printable

K—Standard Cut Plate, both sides printable

UK—Econopak Plate, both sides printable

4 middle digits denote plate size

2 end digits denote thickness of plate, as follows:

40—.003" thick
32—.008" thick
28—.012" thick
24—.020" thick
20—.032" thick
14—.064" thick
8—.125" thick

Number in parenthesis following stock number denotes number of plates per box.

EXAMPLE: UK-1012-24(100)

Econopak, both sides printable, size 10"x12", .020" thick, 100 plates per box

NOTE :

To assure best handling of your order please specify stock number and number of plates per box.

All prices in this catalog apply to commercial specifications and cover sizes, thicknesses etc. which are produced commercially and to commercial tolerances.

Prices are F.O.B. our plant, Cleveland, Ohio, and are subject to change without notice.

State, local, or federal tax not included in the prices listed.

TRIAL KITS

Stock Number

TRIAL KIT NO. 10

Price

\$10.00

Metalphoto plates can be used for a great many time and cost saving products. In order to permit the new user to do research and experimental work, we package this kit which contains everything necessary to let you start with the least amount of time involved.

- 12 4" x 5" Metalphoto Plates
- 3 1" x 5" Test Strips
- 1 Chemical Image Toner (1 qt.)
- 1 Developer (1 qt.)
- 1 Fixer (1 qt.)

Also contains processed sample and simplified instruction sheet.

Stock Number

TRIAL KIT NO. 25

Price

\$27.25

This kit is designed for the user to apply background color to his Metalphoto plates. A selection of plate sizes is included as well as processing chemicals and five Metalphoto Chemical Colors.

- 12 4" x 5" Metalphoto Plates
- 3 8" x 10" Metalphoto Plates
- 6 1" x 5" Test Strips
- 1 Chemical Image Toner (1 qt.)
- 1 Developer (1 qt.)
- 1 Fixer (1 qt.)
- 5 Metalphoto Chemical Colors

(1 pkg. each Gold, Copper, Red, Green and Blue)
Complete processing instructions enclosed.

Metalphoto Econopak Plates

STANDARD QUANTITY PACKAGES

METALPHOTO ECONOPAK plates are supplied with full printable area designated. They are untrimmed and as shipped have a tab on one end—convenient for darkroom handling and hanging.

ECONOPAK is the lowest cost way of buying METALPHOTO plates in larger quantities.

METALPHOTO

The chemicals and other items listed here are tailored to give best results in processing Metalphoto plates. We have compiled this list even though many of them are standard photographic items, and are available from most well stocked photo dealers.

Chemicals

METALPHOTO DEVELOPER . .

DM-2-1 —8 oz. dilutes to 1 quart.....	\$.55
DM-2-4 —1 quart dilutes to 1 gallon.....	1.20
DM-2-20—1 gallon dilutes to 5 gallons.....	4.50

Developer and Fixer packaged in handy plastic reusable bottles.
Metalphoto developer especially compounded for Metalphoto plates.

DM-44

In the past, recommended developers have been existing multi-purpose developers which worked well for Metalphoto processing. Metalphoto Corporation research team has now compounded a totally new single purpose developer tailored to give optimum results from Metalphoto plates.

METALPHOTO DEVELOPER . .

DM-44-1 —1 quart working strength.....	\$.75
DM-44-4 —1 gallon working strength.....	1.65
DM-44-20—5 gallons working strength.....	6.00

METALPHOTO FIXER

FM-1-1 —8 oz. dilutes to 1 quart.....	\$.45
FM-1-4 —1 quart dilutes to 1 gallon.....	.95
FM-1-20—1 gallon dilutes to 5 gallons.....	3.15

METALPHOTO CHEMICAL IMAGE TONER

Supplied in two bottles to make working solution.

Used to intensify image and insure rich black legend.

CT-100-1 —1 Quart Size—dilutes to 1 quart of working solution.....	\$ 1.95
CT-100-4 —1 Gallon Size—dilutes to 1 gallon of working solution.....	7.15
CT-100-20—5 Gallon Size—dilutes to 5 gallons of working solution.....	32.00

For larger quantities of Chemical Image Toner, write the factory and we will be happy to supply you with formulas for making your own very economically.

METALPHOTO CHEMICAL COLORSea. .95

Supplied in packs of dry powder to make 1 gallon of working solution.

Used to color the background of METALPHOTO plates.

AVAILABLE IN FIVE COLORS . .

GOLD	No. MT-110
COPPER	No. ND-120
RED	No. ZR-130
GREEN	No. CZ-140
BLUE	No. B-150

The five colors above were chosen for their good light-fast qualities. For an absolute sunfast Gold Color, we recommend the new GOLD No. LF-160—Dissolves in water to make one gallon working solution.....\$1.95

METALPHOTO SEALING ADDITIVE

For the maximum in abrasion and corrosion resistance, Metalphoto plates should be sealed in an acetate sealing solution. We have packaged one of the better formulas for your convenience in one and five gallon unit sizes.

SA-200-1 **\$1.70**
1 quart dilutes to one gallon working solution.

SA-200-5 **\$6.80**
1 gallon dilutes to 5 gallons working solution.

TRIAL KITS

Stock Number

TRIAL KIT NO. 10

Price

\$10.00

Metalphoto plates can be used for a great many time and cost saving products. In order to permit the new user to do research and experimental work, we package this kit which contains everything necessary to let you start with the least amount of time involved.

- 12 4" x 5" Metalphoto Plates
- 3 1" x 5" Test Strips
- 1 Chemical Image Toner (1 qt.)
- 1 Developer (1 qt.)
- 1 Fixer (1 qt.)

Also contains processed sample and simplified instruction sheet.

Stock Number

TRIAL KIT NO. 25

Price

\$27.25

This kit is designed for the user to apply background color to his Metalphoto plates. A selection of plate sizes is included as well as processing chemicals and five Metalphoto Chemical Colors.

- 12 4" x 5" Metalphoto Plates
- 3 8" x 10" Metalphoto Plates
- 6 1" x 5" Test Strips
- 1 Chemical Image Toner (1 qt.)
- 1 Developer (1 qt.)
- 1 Fixer (1 qt.)
- 5 Metalphoto Chemical Colors

(1 pkg. each Gold, Copper, Red, Green and Blue)
Complete processing instructions enclosed.

CARTRIDGE DEIONIZER

\$9.75

Deionized water on tap—will purify tap water and produce the equivalent of single distilled water for make-up of solutions and sealing finished Metalphoto plates for pennies a gallon. This throw-away type cartridge changes color as it becomes depleted. Five gallons per hour capacity. Attaches to any standard water faucet.

WALL BRACKET FOR DEIONIZER

\$7.50

Wall bracket including flow rate control valve, inlet hose with faucet adapter, and outlet tubing with a plastic ell.

METALPHOTO SEALING TANK

\$27.50

Custom built for sealing Metalphoto plates. An upright tank 4"x11" by 15" deep. It can be placed on any one or two burner hotplate for heating. Plates sealed upright can be touching each other, therefore this tank can seal a good quantity of plates from size 4"x5" up to 10"x12" Econopak plates. These tanks can also be used for developing and fixing Metalphoto plates. Not to be used in toning step unless plastic lined.

Prices f.o.b. our plant Cleveland, Ohio, net 30 days.

Write for our Accessory and Equipment Catalog, if you haven't one in your file.

PRINTED IN U.S.A.

Metalphoto Q Plates

The final step in processing standard Metalphoto plates has been to seal the plate in hot water. The Metalphoto Q plate eliminates the necessity of heat seal, which simplifies the processing.

Metalphoto Q plates are processed the same as standard Metalphoto plates. After toning, the surface of the Metalphoto Q plate is sprayed with Metalphoto Q-Seal. Excess Q-Seal is wiped off the plate with a clean cloth and the plate is ready for use.

A thin, even coating of a clear, spray lacquer, or enamel, may also be used. Either a glossy or dull finish can be produced by this technique.

A trial kit, METALPHOTO Quick-Kit #12, is available for testing Metalphoto Q. The contents of this Kit are listed below.
